Shifting Gears

# Shifting Gears: Gearing Up to Get into the Flow

## Shifting Gears: Gearing Up to Get Into the Flow

Ricky Erway and Jennifer Schaffner

Program officers  
OCLC Programs and Research

A publication of OCLC Programs and Research

# Shifting Gears - Recommendations

- **It's about access**
- **It's about quantity**
- **Selection has already been done**
- **Iterate**
- **Programs not projects**
- **Partnerships**
- **Adopt archival description practices**
- **Discovery happens elsewhere**

# Selecting for digitization

If we could we'd digitize everything en masse

- Look for high-demand collections or series

- Compromise by digitizing samples to gauge the interest

Sometimes we have to do selections

- (Is it worth it?)

Put your efforts into the larger context

Can you get the best of all worlds?

# Taking Our Pulse: The OCLC Research Survey of Special Collections and Archives

## Taking Our Pulse: The OCLC Research Survey of Special Collections and Archives

Jackie M. Dooley  
Program Officer

Katherine Luce  
Research Intern

OCLC Research

A publication of OCLC Research

# Taking Our Pulse - Key Findings

- Many rare and unique material are undiscoverable
- Tough economy renders “business as usual” impossible
- Staff are having trouble keeping up
  
- The top three “most challenging issues”
  - Space
  - Born Digital
  - Digitization

# Taking Our Pulse - Recommendations

- User Services
  - Promote policies that facilitate (rather than inhibit) access
- Born-Digital Archival Materials
  - Identify practices of archivists useful for born digital
  - Basic steps for managing born digital
- Digitization
  - Scope the digitized rare book corpus
  - Develop models for large scale digitization

# Well-intentioned practice for putting digitized collections of unpublished materials online

## Well-intentioned practice for putting digitized collections of unpublished materials online

The primary responsibilities of cultural materials repositories - stewardship and support for research and learning - require us to provide access to materials entrusted to our care. This document establishes a reasonable community of practice that increases and significantly improves access to collections of unpublished materials by placing them online for the purpose of furthering research and learning. Although it promotes a well-intentioned, practical approach to identifying and resolving rights issues that is in line with professional and ethical standards, note that this document does not concern itself with what individuals who access particular items may do with them. While the document was developed with US law in mind, it is hoped that the spirit of the document will resonate in non-US contexts.

If your institution has legal counsel, involve them in adopting this approach; after the approach has been adopted, only seek their advice on specific questions.

### Select collections wisely

- Keep your mission in mind and start with a collection of high research value or high user interest.
- Assess the advantages and risks of relying on fair use (in the US) to support public access.
- Some types of materials may warrant extra caution when considering rights issues, such as
  - Contemporary literary papers
  - Collections with sensitive information, such as social security numbers or medical data
  - Materials that are likely to have been created with commercial intent (because they are more likely to have economic value)
  - Very recent materials that were not intended to be made public
- If research value is high and risk is high, consider compromises, such as making a sensitive series accessible on-site only, until a suitable time has passed.

### Use archival approaches to make decisions

- Check donor files and accession records for permissions, rights, or restrictions.
- Assess rights and privacy issues at the appropriate level, most often at the collection- or series-level.
- Attempt to contact and get permission from the rights-holder, if there's an identifiable rights-holder at that level.
- Include what you know about the rights status in the description of the collection, including if the collection is in the public domain, if the institution holds the rights, or if the rights-holder has given the institution permission to place the digitized collection online.
- Document your processes, findings, and decisions and share them with your professional community.

### Provide take-down policy statements and disclaimers to users of online collections

- Adopt a liberal take-down policy, such as: *"These digitized collections are accessible for purposes of education and research. We've indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we'll remove material from public view while we address a rights issue."*
- Use an appropriate disclaimer at the institutional level, such as "[institution] makes digital versions of collections accessible in the following situations:
  - They are in the public domain
  - The rights are owned by [institution]
  - [institution] has permission to make them accessible
  - We make them accessible for education and research purposes as a legal fair use, or
  - There are no known restrictions on useTo learn what your responsibilities are (if you'd like to use the materials, go to [link])"

### Prospectively, work with donors

- Identify possible intellectual property issues and get relevant contact information.
- Ask donors to state any privacy concerns and identify sensitive materials that may be in the collection.
- Suggest that donors transfer copyright to the institution or license their works under a Creative Commons CC0 license.
- Include statements in your collecting policies and in your deeds of gift or transfer documents that:
  - ensure that no restrictions are placed on content that is already in the public domain,
  - grant license to digitize the materials for unrestricted access even when donors retain the rights,
  - and guard against limitations or restrictions on fair-use rights.

For more about this document, see <http://www.oclc.org/research/activities/rights>  
Revised 05/28/2010

# Well-Intentioned Practice - Main Points

- Select collections wisely
- Use archival approaches to make decisions
- Provide take-down policy statements and disclaimers
- Prospectively, work with donors

# Good Terms: Improving Commercial-Noncommercial Partnerships for Mass Digitization

### Good Terms - Improving Commercial-Noncommercial Partnerships for Mass Digitization

A Report Prepared by Intelligent Television  
for RLG Programs, OCLC Programs and Research

[Peter B. Kaufman](#) and [Jeff Ubois](#)  
Intelligent Television

#### Executive Summary

*In 2007, OCLC Programs and Research engaged Intelligent Television to study the partnership agreements between cultural institutions and for-profit companies for the mass digitization of books and other media. This report presents the findings of that study.*

Libraries have been digitizing portions of their collections for more than twenty years, but recent opportunities to work with private partners, such as Google, Microsoft, and others, on mass digitization has opened up possibilities that were unimaginable just a few years ago. Private funding, commercially developed technology, and market-oriented sensibilities together may generate larger aggregations of digitized books far sooner than the library community had dreamed possible. There are many efforts underway to assess various aspects of these partnerships; this paper focuses on the terms in mass digitization agreements that affect research-community-centered outcomes.

The libraries and other cultural institutions that private companies first approached saw significant potential in these overtures; they were diligent in seeing that near-term local needs were met. Only when it became clear that a significant number of these partnerships were underway did the library community as a whole begin to think about the overall impact of these business relationships on the future of scholarship.

When we fantasize about that future, we imagine a single way to search all digitized books, journals, and other media, a combined index of all the full texts that will enable research that is otherwise

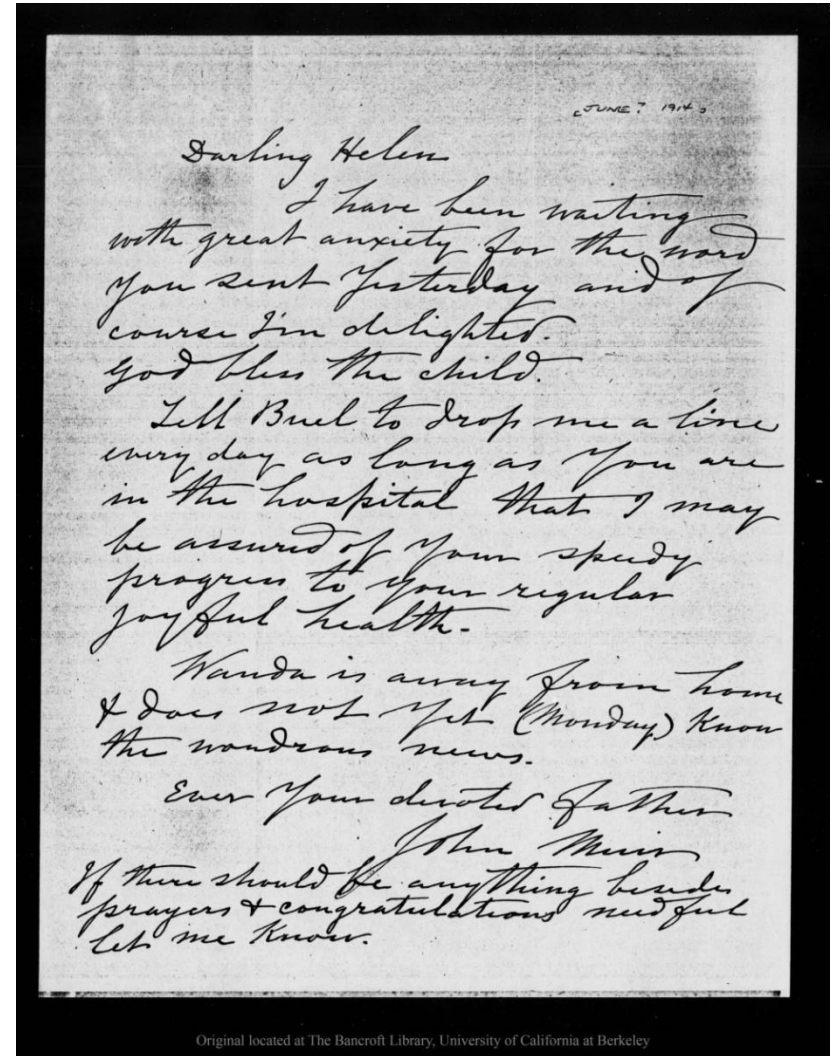

# Good Terms - Recommendations

## Negotiate for

- Limited confidentiality
- Complete deliverables
- More open access allowing the development of new applications
- Less restricted distribution
- Responsible treatment of usage data  
and
- Limited duration and survivability

Sports Release

1944 Copy 1

Minneapolis, Jan. 7/44 One of the lightest hockey schedules ever drawn by a University of Minnesota team will get under way January 7 - 8 when the Gophers face the fast traveling, experienced St. James Club of Winnipeg at the Minneapolis Arena.

At present the St. James series is the only set of games definitely scheduled for Coach Larey Armstrong and his pucksters. Dates and arrangements have not been completed as yet for a meeting with the Canadian Navy team of Port Arthur, however Coach Armstrong feels confident that the dates of January 14 - 15 will be approved by Canadian immigration authorities and military officials which govern the passage of Canadian teams across the border, thus enabling the Port Arthur team to keep its appointment in Minneapolis for their encounters.

Minnesota's old rival in the ice sport, the University of Michigan, may cancel its games set for the Arena the later part of January due to a manpower problem facing the Wolverines this year. Most of the Michigan puck candidates are naval trainees and as such are under the forty-eight hour rule which forbids navy men to be away from their base in excess of the allotted time. On word received from Michigan athletic officials they claim it may prove impossible for them to send a team on the road for a two day stand and still abide by navy orders.

All this, however, has not discouraged Coach Armstrong for he has his squad going through daily drills for the past seven weeks in hope that additional games will be added to the schedule in the near future.

This year's schedule is quite a contrast to the fifteen game campaign of last year in which Minnesota won ten, lost four and tied one, winning

# Scan and Deliver - tiered workflow

## A. Review

- *How do users request digital reproductions?*
- *How are requests for copies approved*
- *How many people need to approve?*
- *Have the items already been digitized?*
- *How do you manage copyright & legal issues?*

## B. Decide

- *Will you keep the images?*
- *Is it useful for you to keep the images?*
- *Do you have sufficient resources to keep them?*
- *What resolution is needed for scanning?*
- *Is the request for high-resolution?*
- *What metadata will you create?*
- *Will you scan the whole volume?*

## C. Scan

- *Who digitizes and describes materials?*
- *Will you perform quality control?*

## D. Deliver

- *How do you deliver digital copies to the user?*

	INSIDE TRACK	MIDDLE TRACK	OUTSIDE TRACK
<b>REVIEW</b>			
REQUEST	Verbal request	Simple form	Detailed forms
